Table 1 OLS Regression of Ecological Satisfaction on Participation and Public Awareness (N=232)

Full model (M3); β = standardised, B (SE) = unstandardised. Controlling for demographics.*

	EMQ		EHB		ECO		MGT		OVERALL	
Predictor	β*	B (SE)	β*	B (SE)	β*	B (SE)	β*	B (SE)	β*	B (SE)
Demographics

n	134		132		118		187		187	
R^2	0.138		0.221		0.137		0.044		0.103	
ΔR^2 (M1→M3)	0.022*		0.047***		0.036†		-0.002		0.017*	
F (model)	2.20*		3.83***		1.90†		0.90		2.25*	

Note. EMQ = Environmental and ecological quality; EHB = Environmental hydrological benefits; ECO = Biodiversity satisfaction; MGT = Park management satisfaction; OVERALL = mean of all four constructs.

β* = standardised coefficient; B = unstandardised; SE = standard error. All demographic variables pre-coded as ordinal integers.

ΔR^2 = increment from M1 (demographics only) to M3 (full model). Listwise deletion per model.
